

Comprehensive Metabolic Panel (CMP)

A CMP checks different body function and processes including:

- Acid and base balance
- Blood protein levels
- Blood sugar levels
- Fluid and electrolyte balance
- Kidney and liver function

What does the test measure?

Albumin
ALP, ALT, & AST
Bilirubin
Blood urea nitrogen

Calcium
Carbon Dioxide
Chloride
Creatinine

Potassium
Sodium
Total Protein

Instructions prior to test:

Fast

Nothing to eat or drink, except water 8 hours prior to test.

Rest & Hydrate

Get a good night's sleep and drink plenty of water. This increases blood volume.

Check with Physician

Take your prescribed medications as usual, unless directed by your physician to do otherwise.
